aws

Additional verification required

Your account is protected with **multi-factor authentication (MFA)** .

To finish signing in, enter the code from your MFA device below.

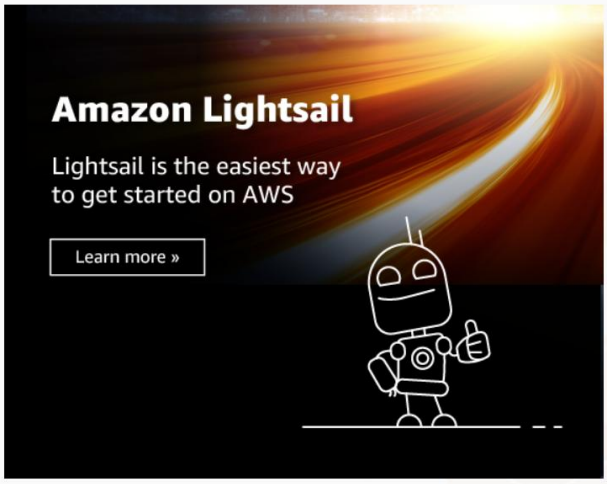

MFA code

064434

Sign in

Sign in to a different account

Trouble signing in?

MFA device assigned

You can register up to 8 MFA devices of any combination of the currently supported MFA types with your AWS account root and IAM user. With multiple MFA devices, you only need one MFA device to sign in to the AWS console or create a session through the AWS CLI with that user.

Add permissions

Add user to an existing group or create a new one. Using groups is a best-practice way to manage user's permissions by job functions. Learn more

Permissions options

- ○ Add user to group
  Add user to an existing group, or create a new group. We recommend using groups to manage user permissions by job function.
- ○ Copy permissions
  Copy all group memberships, attached managed policies, inline policies, and any existing permissions boundaries from an existing user.
- ◉ Attach policies directly
  Attach a managed policy directly to a user. As a best practice, we recommend attaching policies to a group instead. Then, add the user to the appropriate group.

Permissions policies (1/1586)
